**Subject:** Planning comment, application number is Y19/1473/FH

I want to put in a rejection on planning application number Y19/1473/FH, if planning is granted for two property's to be built, it will course so many problems, ( 1, ) the access, it will be so dangerous as there is a bus stop at the top [REDACTED] that stops opposite the plot, there is know way they are coming over [REDACTED] to enter there plot, it will course so much more traffic going to and from the plot and could course accidents, (2) there will be more cars in and out its not fair to people who live he now, why should we suffer course of there greed for two property's, (3)the drainage is going to be a proplem, we are all on septic tanks and to have two more property's will put a strain on our tanks,there is the waste water, I have been told that there is going to be new regulations coming out this year about the septic tank drainage, (4) at the end [REDACTED] there is a nature reserve patch of land, if you let there be two more property's to be built that will block it off and push the wild life away with the noise,it floods at the end off the plot which courses a proplems,

(5) when I brought my property just over 2 years ago, I brought it to spend my life here, i now feel I have to move, I was told that there was out line for a small bungalow to be built, they put in for 3 houses to start with to be built, but pulled it out, then put in for 2 which has been refused, everyone is so pleased, but now they have took it to appeal, it's not fair on us if it's granted, why should we have to put up with the fumes, lorrys, mud, extra traffic,the list goes on !!!!!

From Mrs j Hayford,
