

BALUSTRADE.

SIMPLE. FAST. UNIQUE.

**CAN BE
COMPLETELY
INSTALLED
FROM THE
'SAFE SIDE'**

FRAMELESS GLASS BALUSTRADE SYSTEM

- 50% faster to install than alternatives
- Saves Time & Money – The horizontal TAPER-LOC® design allows the system to be adjusted, dismantled and re-set completely from the 'safe side' of the balustrade (including both 'fast-seal gaskets'), avoiding scaffolding cost and time (particularly useful in retrospective fit and when changing a glass panel)
- Suitable for use with 17.52, 21.52 and 25.52mm laminated toughened glass (respective base shoes are 9BL68, 9BL21 and 9BL25)
- Bottom (D) and side (F) drilled base shoe available
- Can be clad in 6 standard architectural finishes
- Also available in satin anodised finish - no need for cladding!

**INNOVATIVE
EXTRUDED
STRUCTURE**

ALLGOOD IRONMONGERY COMPLETES THOUGHTFUL DESIGN AT MAGGIE'S CENTRE

Maggie's Centre in Oldham has incorporated Allgood's Holt ironmongery to complete its thoughtful and hopeful design.

Handcrafted from European oak, the Holt range seamlessly blends with the hardwood cross-laminated timber (CLT) building and reduces the impact of neuropathy for the centre's patients. Incorporating Holt L shape

lever handles, WC turns, coat hooks, doorstops and toilet roll holders as well as disabled toilet furniture, Maggie's Centre in Oldham has created a thoughtful environment for its users. Holt was developed to be mindful of those suffering with conditions such as arthritis and neuropathy so is perfect for Maggie's Centre's and other care environments.

EXPONA FLOW HELPS TO COMPLETE CHESTERFIELD CANCER CENTRE PROJECT

Expona Flow sheet vinyl flooring from Polyflor, the UK's commercial vinyl flooring specialist, was recently installed at the new NGS Macmillan Unit at Chesterfield Royal Hospital.

Expona Flow PUR vinyl flooring in the Light Grey Concrete and Cool Concrete shades was installed throughout The NGS Macmillan Unit by Active Flooring in the reception area, circulation areas, corridors, staircases and wards. 2000 PUR homogeneous sheet vinyl flooring in Stream was also used for the staff kitchenette area.

Available in a two-metre wide format with a 2mm gauge and 0.7mm wear layer, the UK manufactured Expona Flow PUR flooring collection includes 50 high performance wood, stone and abstract designs.

Ideal for a range of heavy commercial environments where high footfall levels are to be expected, Expona Flow PUR is enhanced with Polyflor's robust polyurethane reinforcement which is cross linked and UV cured for a simple polish-free maintenance regime and superior cleaning benefits. Expona Flow's environmental credentials are impressive, achieving a BRE A+ rating for healthcare interiors and Indoor Air Comfort Gold, assuring that VOC emissions are below any globally determined levels. It is also 100% recyclable via the Recofloor recycling scheme.

MARLEY ALUTEC SUPPLIES GROUNDBREAKING PROJECT

Marley Alutec has supplied its products to Magnolia House, a new purpose-built £1million support centre at Birmingham Children's Hospital. The palliative care centre is a first

of its kind development; the non-clinical, single storey building is located in a central part of the hospital's site. The company's products were specified by the architect,

Pinnegar Hayward Design, because of their abilities to be curved, as well as their high-performance values.

Dan Brown, Project Lead at Pinnegar Hayward Design commented: "I've had experience with Marley Alutec previously and was confident in using their eaves systems. The fact the company can produce bespoke pieces is a big advantage, as designs can sometimes be constrained by off the shelf products."

Products from Marley Alutec's Evoke fascia and soffit range were used throughout the project. The roofline solution is manufactured from composite

aluminium, a material that has previously been used on some of the world's most prestigious developments. Combining exceptional durability and aesthetic appearance, the range perfectly complimented the ethos of the project.

Also installed at the project was Marley Alutec's Aligator Boxer boltless guttering and Flush-fit downpipes. As with all of the company's aluminium products, the Aligator system requires no specialist tools or contractors to fit or adapt on site and are extremely lightweight and easy to install.

ACCESSIBLE DESIGN FOR COMMERCIAL WASHROOMS

Adapted washrooms tend to be functional and have an institutional feel. To challenge this, DELABIE has launched the Be-Line® range with design at its core to remove the institutional feel of public sector washrooms. However, there is no compromise on functionality since the Be-Line® range combines aesthetics with ergonomics, providing user safety for accessible washrooms in the public and commercial sector.

its grab bars and seats to over 200kg, guaranteeing stability and safety for all. Made from extruded and injection-moulded aluminium, the Be-line® range is durable and can withstand intensive use. The smooth, homogenous surface is easy to clean and the lack of joints minimises niches where bacteria proliferate.

Ergonomic

Featuring a flat front face, Be-line® grab bars fit the hand's natural curve perfectly. The ergonomic design prevents the

hand from rotating, providing a comfortable and secure grip. This, combined with a minimal gap between the wall and the bar, reduces the risk of fracture since the hand cannot slip between the wall and the bar.

The Be-line® range of grab bars and seats is available in two finishes, white aluminium or metallised anthracite, providing a good visual contrast, yet coordinating well with any style of washroom.

ALTRO WALLS SYSTEM HELPS OPEN UP A STIMULATING NEW SENSORY WORLD FOR CHILDREN

A hydrotherapy pool for children and young people with significant physical and learning difficulties has been transformed using specialist products from Altro, opening up a stimulating new world of sensory fun and excitement with no compromise on safety or hygiene.

Vranch House is a centre for the treatment of over 2,000 outpatients with physical difficulties, a provider of various therapies throughout Devon and an independent Day School in Exeter for children aged 2 to 12 with significant physical difficulties.

Hydrotherapy has always been on the agenda at Vranch House and architect Carole Trim said: "The walling choices were integral to this vision.

"Altro was a key partner on the project because they were sympathetic to the broader picture and what we wanted to achieve for the children. Their level of experience and understanding helped us to find a solution that delivered across the board; on

quality, safety, aesthetics and durability.

"We have brought more colour and light into the hydrotherapy by installing Altro Whiterock White hygienic wall sheet throughout the interior, and using it as a movie screen. It has a smooth, white surface which is perfect for displaying and reflecting colours, images and shapes to accompany music during therapy — a thrilling experience for pupils as the light and sound bounces off the walls and water.

"This product ticked a lot of boxes on so many levels.

It would not only boost the sensory and visual experience for pupils, but also prove a hygienic, practical choice."

Altro Whiterock White is impact resistant, grout-free and easy to clean. Its smooth white surface and classical purity make it a timeless choice for any interior. Made from a high-quality, PVCu polymer that can handle temperatures up to 60°C, Altro Whiterock White meets all current European Union (EU) Directives on health and hygiene.
