Subject: Application Y18/1141/FH

We wish to object to the above ref; Planning Application from Cabu By The Sea as follows -

The initial development is nearing completion and certainly looks better than the derelict cabins that were on the site before but it already looks

To add another 11 cabins would surely encroach on land that has not been previously built on. We understood that any development would have previous buildings. Natural England, who have not yet put in their report, regard this site as one of Specific Interest.

Adding another 11 cabins would make the site far too crowded, it also impacts on the noise and traffic affecting the local inhabitants. The A259 i without the completion of the 84 units being built near the pumping station opposite Jefferstone Lane.

We appreciate that the council wants to bring in visitors to the area **BUT, what about the impact on those who pay to live here?** There are page Bats, wildlife etc; but nothing about how this will affect the people who live next to and opposite the site.

Why has the Sub-station been placed as close as possible to the fence and a residential property, there is plenty of land to choose from, why not understand that this is not under your control so will follow this up with the supplier.

We assume that the planting and baffle fencing will be put in place at the earliest, at present, your website is down and therefore we cannot che provision initially suggested.

Regards

Maureen & Ken Lennon

as Discussed. This is the message returned to me twice as undelivered.
