Site Design Request – Roman Way, Land Adjacent Herne Court, Horn Street, Folkestone, CT19 4LB

Dear Mr Griggs,

Thank you for your recent request to supply Virgin Media services to the above site.

Further to our conversation I can confirm that the above site is with our planning team and we have asked for an update as soon as possible

As you are aware your site will be connected to the existing Fibre Optic/HFC network around the site that can offer up to 200MB internet connection, TiVo TV, and telephone services.

Our standard ducts size used for new developments is 96mm, which will be laid in to the riser cupboard/Comms Area, this means that this will future-proof the block if our network type is changed and we need to bring in different/further cables from our off site network.

All Virgin Media off site civils network tie in, internal site build of cabinets/DPs and network cabling will be completed by our contractors at our own cost.

We will be able to work to your build program, so that we can offer our services as soon as the site is completed.

Your new build liaison officer for this site will be Lee Baker and he can be contacted on 07800 711762.

Please do not hesitate to contact me if you require any further information.

Regards

Mark Munday
New Build Officer
