Subject: Objection to Y17/0886/SH/LD

I am formally objecting to the building in Millfield that has been constructed without planning permission and against the original plans. As a resident it is going to make parking in the evening even harder than it is now, bringing in a potential 6 to 9 more vehicles. Then there is the eyesore these have created in building so close to another build. How are they going to check the outside skin and make good? If repairs ever become necessary to either wall how will this been done? There isn't even space for guttering so all rain water will be running down the building next to it cause more damage.

In my honest opinion this should be removed and replaced with possible two town houses of reasonable size rather than three pushed into the small plot with total disregard to the residents and occupiers of Millfield and in total defiance of the Build Planning process. Are you going to allow planners / Architects/ constructors to apply for planning permission then totally ignore the local government and build what ever takes there fancy.

An example should be made and a line in the sand drawn. Show that Shepway Council isn't to be ignored and have this building in the state it is now removed.

Yours sincerely

Michael R Waller
