I'm writing to strongly object to the planning application for development on Princes Parade.

This is a beautiful and historic area which I like countless others enjoy on a daily basis for walking and running. I have been coming to this wonderful place for over 40 years, having lived in Folkestone all my life.

I am deeply concerned about the negative impact this development would have on the local wildlife and environment.

I object to the building of any housing or leisure centre on this site. Why not improve and develop the existing Hythe swimming pool site? I do not believe that the proposed housing will be affordable for local people, so this will only be detrimental to the local community.

Please preserve this peaceful, wild, open space for future generations to enjoy.

Please confirm that my comments have been submitted.
