Dear Sirs My main concerns regarding this development are the height of the buildings which will have an impact on a conservation area. The traffic congestion in Tontine street will increase, and parking will become more of a nightmare than it is at present. There is no infrastructure to support such a large development. There is a shortage of school places and lack of G.P.,s already. Lack of any recreational facilities is a very negative aspect especially for young people. Marilyn Edey, [REDACTED]
