Attention Mr Alexander Kalorkoti..Planning Officer

Dear Mr Kalorkoti

With reference to the above Application for rear extension and loft conversion for a studio flat..

[REDACTED], this will change slightly when the plans go forward to build a house out the back opening onto Bartholomew Street.

The things that concern us is that where will the weekly refuse be placed , at the moment we are supplied purple sacks which I presume will be the same for the studio flat , we have a big seagull problem up here so my suggestion is that an area be erected for the protection of these sacks.

Also where will there be an escape route if there was any emergency etc..the path from 47 High Street is overgrown and although there is a gate there ..no key is supplied.

There is no lighting up here so emergency lighting should be in place.

[REDACTED]
[REDACTED] if this application goes through then personally I think the back area should be strongly looked at .

I have copied in Colette Redmond as she was very helpful over some other issues we had with the flat.

Look forward to your earliest reply

Kind Regards
Linda Tricker..Stuart Tricker..Katrina Wright..
