- Attractive appearance

To be installed to the recommended depth as provided by the play manufacturer.

To be edged with Rubber border edging by PlayBark or similar approved

Breedon gravel, colour buff/fawn or similar approved

Emorsgate Grass Seed Mix or similar approved

EG22 – STRONG LAWN GRASS MIXTURE

Composition

EG22 is an excellent all purpose lawn mixture suited to a wide range of domestic and landscape applications. EG22 contains finer bent and fescue grasses plus some dwarf perennial ryegrass and smooth-stalked meadow-grass. This combination produces both an attractive fine turf structure and resilience to wear for pathways and play areas. EG22 is a highly adaptable mix: on heavily used areas and fertile ground the stronger ryegrass will predominate, whilst in other areas a finer sward will develop. As well as being tolerant of a wide range of conditions the mix is quick and easy to establish.

Grasses

%	Latin name	Common name
2.5	Agrostis capillaris	Common Bent
2.5	Agrostis castellana	Highland Bent
50	Festuca rubra	Slender-creeping Red-fescue
25	Lolium perenne	Perennial Ryegrass
20	Poa pratensis	Smooth-stalked Meadow-grass
