Subject: 21/0825/FH

To whom it may concern:

I have added a comment objecting to the above application but I couldn't add a photograph in the comment. I enclose the photo here

A) The proposed building will completely block the light from [REDACTED] 1st floor window in the alley, At present the window overlooks the ground floor roof of the building, by building the extension the window will have a brick wall as its outlook only 1.14m away with another floor above that as well.

B) The access alleyway is only 0.98m wide at the narrowest point, and is the only access to the rear of the run of shops for commercial waste bins etc. The construction would involve scaffolding which would not allow the waste removal for at least three businesses. Also, it would be the only access for the builders and their materials to get to the site, as well as the disruption and security of the normal day to day running of my business and others.

I formally object to this planning application.

Regards
Chris Pullem
