

Trimetals Cycle Stores

Trimetals offers a choice of products specifically designed for the safe, secure and convenient storage of bicycles. From standard models right up to “Official Police Approved” Protect-a-cycle versions, we have the ideal solution to your bike storage problems.

Quality Fixings

All fixings are stainless steel

All aluminium hinges and rivets

Easy to use

Spring assisted opening action

Hasps

Stainless steel hasps and staples (optional on standard model)

Lockable

Lockable – to two padlock points

Storage

Stores up to three adult bikes

A selection of three models is available. All store up to three adult bikes but feature increasing levels of security; you can choose which is suitable depending on your location and value of bicycles stored.

A clever patented spring-assisted opening action allows complete and easy access to your cycles and, when closed, the unit benefits from two padlock positions as standard, or up to four locking points with the use of our optional hasp and padlock sets. For increased security, this unit is also designed to be bolted down (from the inside) onto a hard base, which prevents the store from being lifted.

The Bicycle Store is produced from a special PVC-coated galvanised steel, which is totally maintenance free and fire resistant. It is also guaranteed against corrosion for 25 years.

Tested and recommended by the UK's leading cycling magazines, the standard Bicycle Store has the height and width to accommodate all types of mountain or racing bike and, depending on the design of the cycles, can accommodate up to three.

Bicycle Store

“ This is what we
have been waiting
for – clever design
and easy to use. ”
Mr O – Tokyo, Japan
