

7.0 Site-wide Strategies

7.10 Furniture Strategy

The proposed street furniture will be high quality, robust, and suited to the industrial heritage of the site.

Materials used will include corten steel and untreated timber. Reclaimed elements will be used wherever appropriate.

The site will include rising bollards, which will allow vehicular movements to be managed, without restricting the movement of pedestrians.

The wave wall will meet the requirement of the site to renew its sea defenses for the future.

LEGEND

Timber baulk benches

Timber baulk benches with naval flag motif

Timber Amphitheatre

Timber sun loungers and picnic tables

Post and chain railing

Corten litter bin

Rising bollard

Corten cycle stands

Wave wall
